

This list is designed as a resource document and is updated periodically but should always be independently verified. If you have additional questions or have experience and updates that would be helpful to this document, please contact Dennis Herbert at 254-742-8465, if no answer please leave message.

Definitions:

Acreage Requirements: 5-20 acres once homestead is subtracted

Intensity Value: The number of hives required for the land

Productivity Value: The taxable value of the land with bees on the property (varies by county and is often a set price OR based on land category)

Duration: Required amount of time the bees must stay on the property (since many bees/beekeepers offer commercial application for growers and are migratory)

Land Category: Counties have a map or defined land categories such as native pasture, timber, etc. that they assign a productivity value to.

Definitions:

Acreage Requirements: 5-20 acres once homestead is subtracted

Intensity Value: The number of hives required for the land

Productivity Value: The taxable value of the land with bees on the property (varies by county and is often a set price OR based on land category)

Duration: Required amount of time the bees must stay on the property (since many bees/beekeepers offer commercial application for growers and are migratory)

Land Category: Counties have a map or defined land categories such as native pasture, timber, etc. that they assign a productivity value to.

Definitions:

Acreage Requirements: 5-20 acres once homestead is subtracted

Intensity Value: The number of hives required for the land

Productivity Value: The taxable value of the land with bees on the property (varies by county and is often a set price OR based on land category)

Duration: Required amount of time the bees must stay on the property (since many bees/beekeepers offer commercial application for growers and are migratory)

Land Category: Counties have a map or defined land categories such as native pasture, timber, etc. that they assign a productivity value to.
